

Curriculum Vitae

Jadwiga (Yaga) H. Richter, Ph.D

(previously 'Jadwiga H. Beres')

Climate and Global Dynamics Laboratory (CGD)
National Center for Atmospheric Research (NCAR)
P. O. Box 3000, Boulder, CO 80305

jrichter@ucar.edu
Tel: 303-497-2613

Accomplished scientific and programmatic leader with commitment to developing people, E&O, DEI, strategic planning and implementation.

1. Education:

Leadership Academy , NCAR/UCAR, Boulder CO	2019
Graduate Certificate in Instructional Design , University of Wisconsin, Menomonie, WI	2015
Ph.D. Atmospheric Sciences , University of Washington, Seattle, WA	2002
<ul style="list-style-type: none">• Advisors: Dr. James Holton, Dr. M. Joan Alexander• Thesis: Gravity waves generated by tropical convection: generation mechanisms and implications for global circulation models	
B.S. Mathematics , State University of New York, Purchase, NY	1997

2. Work History:

Interim Director , CGD, NCAR, Boulder, CO	Spring/Summer 2023
Senior Scientist , CGD, NCAR, Boulder, CO	2022 - present
Assistant to the CGD Director for Strategic Plan Implementation , CGD, NCAR, Boulder, CO	2020 - present
Scientist III , CGD, NCAR, Boulder, CO	2017 - 2022
Project Scientist II , CGD, NCAR, Boulder, CO	2013 - 2017
Scientist II , CGD, NCAR, Boulder, CO	2009 - 2012
Scientist I , CGD, NCAR, Boulder, CO	2006 - 2009
Education and Outreach Visiting Fellow , Cooperative Institute for Research in Environmental Sciences (CIRES), University of Colorado, Boulder, CO	2005 - 2006
Visitor , Atmospheric Chemistry Division (ACD), NCAR, Boulder, CO	2005
ASP Postdoctoral Scientist , Joint appointment between High Altitude Observatory (HAO), CGD, and ACD, NCAR, Boulder, CO	2002 - 2005

Field Project Participant , Convection and Moisture Experiment 4, Jacksonville, FL	2001
• Operated an instrument on the NASA ER-2 and DC-8 aircrafts	
Scientist , Young Scientists Summer Program, International Institute for Applied Systems Analysis (IIASA), Laxenburg, Austria	2000
• Researched climate change and hurricane activity for policy makers	
Research Assistant , University of Washington, Seattle, WA	1997 - 2002
• Modeled convection and gravity waves using a mesoscale model	
Research Assistant , State University of New York, Purchase, NY	1997
• Analyzed turbulence data from British Airways flights	

3. Scientific Accomplishments:

3.1 Contributions to Community Models:

[7] Contributed to the development of a high vertical resolution/high top version of CAM	2020
[6] Developed a high vertical resolution version of WACCM in order for WACCM/NCAR to participate in the SPARC quasi-biennial oscillation initiative (QBOi) project. Led NCAR's contribution to QBOi and one of the QBOi core papers. Publications [57, 58, 59, 65, 76]	2015 - 2018
[5] Led the transition from the 2x2.5° to the 0.9x1.25° version of the Whole Atmosphere Community Climate Model (WACCM), version 5. Improved the gravity wave parameterization to obtain an internally generated quasi-biennial oscillation. Publication [31]	2015
[4] Developed a version of Community Atmosphere Model (CAM) with a raised model lid and a realistic representation of sudden stratospheric warmings and internally generated quasi-biennial oscillation. Publications [27, 30].	2014 - 2015
[3] Changed the entire non-orographic gravity wave source representation in WACCM from an arbitrary to a physically based parameterization. Publication [15]	2009 - 2010
[2] Added convective momentum transport parameterization to the convection parameterization in CAM, which resulted in a very large improvement in the representation of the El Nino Southern Oscillation. Publications [12, 13]	2005 - 2006
[1] Changed the convective gravity wave source representation in WACCM from an arbitrary to a physically based representation. Publication [7]	2004 - 2005

3.2 Major Scientific Advances:

[6] Led an innovative study of sources of subseasonal predictability [108]	2021 - 2022
[5] Led the creation of ARISE-SAI (Assessing Responses and Impacts of Solar climate intervention on the Earth system with stratospheric aerosols) simulations and coordinates analysis among team at various institutions funded by the Safe Climate Research Initiative. Publications [95, 96, 99, 100, 102, 103, 104]	2021 - 2023

[4] Pioneered the development of a subseasonal prediction system with CESM1, CESM2, and CESM2(WACCM), including the capability for near real-time forecasting. Publications [70, 71, 72, 79, 83, 84, 89, 93, 94, 106]	2016 - 2021
[3] Led a team effort on examining the role of stratospheric SO ₂ injections on climate. Project resulted in the demonstration that surface temperatures in CESM1(WACCM) can be kept at 2020 levels (despite greenhouse gas emissions) using SO ₂ injections into the stratosphere at four different locations, and creation of the first Geoengineering Large Ensemble (GLENS). Publications [32, 33, 34, 35, 36, 38, 40, 41, 42, 44, 45, 47, 49, 53, 55, 67, 68, 69, 80, 86]	2015 - 2018
[2] Demonstrated that with improvements to the gravity wave parameterization and increased vertical resolution, a realistic quasi-biennial oscillation can be obtained in CAM. Publications [24, 25]	2013 - 2014
[1] Used linear theory and mesoscale simulations to describe and quantify the relationships between gravity wave properties and convection properties. Developed the first source spectrum parameterization for convectively generated gravity waves. Publications [2, 3, 4, 5]	2001 - 2004

4. Proposals and Grants (\$22M PI or Co-PI, \$4M Co-I since 2006)

[20] DOE, CO-I: Improving the Quasi-biennial oscillation through surrogate-accelerated parameter optimization and vertical grid modification, PI: James Benedict (LANL), \$1.9M (NCAR), \$8.7M Total	2022 - 2027
[19] NOAA, Co-I: Assessing and comparing impacts of solar climate intervention in CESM2 ensembles utilizing strategically located marine cloud brightening and stratospheric aerosol injection, PI: Chih-Chieh Chen, \$750,000	2022 - 2025
[18] DOE, PI: Improvement and understanding of tropical convection and variability in E3SMv2 and CESM2, \$125,000	2022 - 2023
[17] DOE, Co-PI: Cooperative Agreement To Analyze variabilItY, change and predictabilitY in the earth SysTem (CATALYST), PI: Gerald Meehl, \$8.6M	2021 - 2023
[16] SilverLining NGO, PI: Small ensemble of climate intervention simulations using stratospheric aerosols, \$50,000	2021 - 2022
[15] UCAR, PI: Towards actionable science: assessment of water availability under climate change and climate intervention scenarios, \$161,684	2021 - 2022
[14] NOAA, Co-PI: Marine cloud brightening as a climate intervention strategy simulated by Community Earth System Model version 2, PI: Chih-Chieh Chen, \$125,000	2021 - 2022
[13] SilverLining NGO, PI: Impact of climate intervention using stratospheric aerosols on weather extremes, \$467,000	2021 - 2023
[12] NSF, Collaborator: Collaborative Research: Improving the representation of the Quasi-biennial Oscillation and its surface impacts in NCAR climate models. PI: Martina Bramberger, Northwest Research Associates	2021 - 2024
[11] NSF, Collaborator: What are the fundamental limits/trade-offs of stratospheric aerosol geoengineering? PI: Douglas G. MacMartin	2020 - 2022
[10] DOE, Co-PI: Cooperative Agreement for To Analyze variabilItY, change and predictability in the earth SysTem (CATALYST), PI: Gerald Meehl, \$10M	2019 - 2021

[9] NOAA, Co-I: Benefits of stochastic parameterization on the sub seasonal and seasonal timescales in hindcasts with CESM and UFS; PI: Judith Berner, \$860,000	2019 - 2022
[8] DOE, PI: Improving Momentum Transport Processes in E3SM Co-PIs: M. Moncrieff (NCAR) and S. Xie (LLNL), \$1,050,000	2018 - 2021
[7] NOAA, PI: Subseasonal to Seasonal Prediction with NCAR's CESM2-WACCM Co-PIs: J. Perlitz (NOAA-ESRL) and D. Collins (NOAA-CPC), \$340,000	2018 - 2020
[6] NSF, Collaborator: EAGER: Introducing a design element into stratospheric aerosol geoengineering, PI: Douglas G. MacMartin	2018 - 2020
[5] DARPA, PI: Building confidence in an intelligently-designed climate intervention strategy. Co-PI: S. Tilmes (NCAR), \$240,000	2017
[4] NOAA, Co-PI: Role of stratospheric processes in predicting ENSO-NAO connections on subseasonal timescale. PI: J. Perlitz (NOAA-ESRL), Co-I's: J. Bacmeister (NCAR) and L. Sun (NOAA-ESRL), \$508,505	2016 - 2018
[3] DARPA, PI: A Holistic Assessment of Injection of SO ₂ into the Stratosphere, Co-PI: S. Tilmes (NCAR), \$400,000	2015 - 2016
[2] NSF, Collaborator: Examining the Connections between Observed Atmospheric Gravity Waves and Convective Clouds for Improved Climate Simulations, PI: M. Joan Alexander (CoRA)	2014 - 2017
[1] NASA, Co-I: Improving gravity wave parameterizations for next generation of troposphere/middle atmosphere general circulation models. \$500,000	2006 - 2009

5. Education and Outreach

5.1 Graduate and Undergraduate Student Mentorship

[8] Graduate Student Mentor for Kai Huang, George Mason University	2021 - 2023
[7] Graduate Student Mentor for Todd Rhodes, Coastal Carolina University	2016
[6] Graduate Student Mentor for Oliver Watt-Meyer, University of Toronto	2015
[5] Graduate Student Mentor for Junhong Wei, Pennsylvania State University	2015
[4] Undergraduate Student Mentor for Andre Hernandez-Espiet, U. Metropolitana	2015
[3] Graduate Student Mentor for Weiye Yao, University of Michigan	2014
[2] Graduate Student Mentor for Alex Hassiotis, visitor from Pennsylvania State U.	2006
[1] Undergraduate Student Mentor , SOARS student	2003

5.2 Thesis Committees

[4] Ph.D Thesis Committee Member for Kai Huang, George Mason University	2021-2023
[3] Ph.D Thesis Committee Member for Todd Rhodes, Coastal Carolina University	2020-2021
[2] Ph.D. Thesis Committee Member for Weiye Yao, University of Michigan	2014
[1] Ph.D. Thesis Committee Member for Amir Sayed, Carleton University	2014

5.3 Public Outreach

Lecturer , NCAR Explorer Series, “Turning down the thermostat: Climate intervention using stratospheric aerosols”	2022
Participant , STEM for all video show case video on the NCAR Explorer Series https://stemforall2021.videohall.com/presentations/2214	2021
Science Mentor , Earth Explorers, Westview Middle School	2019 - 2020
Lead organizer , NCAR Explorer Series <ul style="list-style-type: none">• Developed vision for and ensured success of all events• Coordinated efforts between 30 team members from NCAR & UCAR	2015 - 2017
Coordinator , CGD/NCAR Education and Outreach Activities <ul style="list-style-type: none">• Contributed to education and outreach strategic planning for NCAR• Fostered collaborations related to climate education and outreach with Universities and other education and outreach groups at NCAR/UCAR	2015 - 2017
Participant , 2-day Science: Becoming the Messenger Workshop <ul style="list-style-type: none">• Learnt about effective communication to a lay audience• Practiced on-camera interviews and presentations with professional feedback	2014
Volunteer Climate Educator , Climate Reality Project <ul style="list-style-type: none">• Presenter of a climate change education lecture to diverse audiences	2013 - 2015
Participant , Climate Reality Leadership Corps Training with former Vice President Al Gore, Chicago, IL	2013
Keynote Speaker , “Climate and Weather: The Two Go Together”, National Center for Atmospheric Research, Boulder, CO	2006
Education and Outreach Program Designer , CIRES, University of Colorado, Boulder, CO <ul style="list-style-type: none">• “WeatherWise” badge program and kit designer for Girl Scouts• “WeatherWise” program testing and implementation• “Radiosonde Launch” film design, production and editing	2005 - 2006
Education and Outreach Program Designer , ASP, NCAR <ul style="list-style-type: none">• Created and developed “Climate and Weather: The Two Go Together”, Girls Scouts at the National Center for Atmospheric Research (NCAR) program• Program invites Girl Scouts to NCAR twice a year for a day of immersion into atmospheric science and atmospheric science careers	2005
Mentor , Building Bridges in Education Conference	2004
Content Editor , NASA Astroventure program <ul style="list-style-type: none">• Edited content of web-based E&O materials for NASA	2004
Role Model , NASA Astroventure program <ul style="list-style-type: none">• Interviewed and profiled for NASA website to inspire girls to pursue a science career	2004
Online Teacher , National Teachers Enhancement Network <ul style="list-style-type: none">• Developed and taught a 15-week online course: “Weather and Climate for Teachers”	2004 - 2005

Participant, 4-day “Education Workshop for Scientists, Engineers and EPO managers” 2003

Space Science Institute, Boulder, CO

- Learned about effective strategies for involvement of scientists in education and outreach activities
- Developed a better understanding of the ‘bridging the educational gap’ problem
- Connected with E&O Program Managers across the US

Outreach Coordinator, Department of Atmospheric Sciences, University of

Washington, Seattle, WA

2000 - 2001

- Managed department outreach activities to meet the needs of local middle schools
- Organized department tours, demos, and coordinated outreach volunteer participation

Outreach Volunteer, Department of Atmospheric Science, University of Washington,

Seattle, WA

1998 - 1999

- Performed science demonstrations at middle school science fairs
- Taught atmospheric science on science days in middle-schools
- Introduced kids to atmospheric science through department tours and simple demonstrations

Lead Teaching Assistant, Department of Atmospheric Sciences, University of

Washington, Seattle, WA

2000 - 2002

- Managed 12 to 15 teaching assistants
- Supervised classroom visits, developed labs and activities for “Weather 101”

6. Science Community Service

Scientific Steering Group Member, Stratosphere-troposphere Processes
And their Role in Climate (SPARC)

2022 - present

Member, AGU James Holton Award Committee

2022 - present

Organizing Committee Member & Local Host, SPARC General Assembly

2022

Co-Lead, Stratosphere Troposphere Processes
And their Role in Climate (SPARC) QBOi Activity

2022 - present

Advisory Member, CGD/NCAR Diversity Equity and Inclusion (DEI) Committee

2022 - present

Member, CGD Exchange Steering Committee

2021 - 2022

Assistant to the CGD/NCAR Director for Strategic Planning

2020 - present

Co-Chair, CESM Earth System Prediction Working Group (ESPGW)

2020 - 2022

Member, CAM vertical resolution grid taskforce

2020 - 2022

Member, NCAR NWSC-3 SRAP Committee

2020

Member, NCAR COVID-19 Task Team

2020

Member, NCAR response to RFI on Earth System Predictability Committee

2020

Local Host, SPARC Scientific Steering Group Meeting

2019

Co-founder and Scientific Steering Group Member, Geoengineering Modeling Research Consortium (GMRC)

2019 - 2022

Co-lead, NCAR/CGD Earth System Prediction Theme

2019 - 2022

Member , NCAR Strategic Planning Committee	2019
Member , International Commission of the Middle Atmosphere (ICMA)	2019 - present
Associate Editor , Journal of the Atmospheric Sciences	2019 - present
Member , Science Advisory Panel (SRAP) for the NCAR/CISL NWSC-3 Procurement	2018 - 2021
Co-Lead , NCAR/UCAR Innovation Council	2017 - 2020
Developer , Community Atmosphere Model, Community Earth System Model	2005 - present
Developer , Whole Atmosphere Community Climate Model	2003 - present
Reviewer , Journal of the Atmospheric Sciences, Journal of Geophysical Research, Geophysical Research Letters, Bulletin of the American Meteorological Society, Climate Dynamics, Journal of Solar and Terrestrial Physics, Weather & Forecasting	2002 - present
Program Committee Member , 2016 SPARC Gravity Wave Symposium	2015
Co-Chair , Climate and Weather of the Sun-Earth System Working Group	2011 - 2012
• Coordinated research efforts between international group of gravity wave scientists	
Session Organizer , Annual American Geophysical Union Meeting	2006
Retreat Organizer , TIIMES, National Center for Atmospheric Research, Boulder, CO	2006
• Organized a week-long gravity wave retreat consisting of 30 international gravity wave experts	
• Led the effort of putting together a white paper following the retreat	

7. Honors and Awards:

NCAR EdEC Special Recognition Award, NCAR Education, Engagement & Early-Career Development , For outstanding work in support of the NCAR Explorer Series	2022
Outstanding Accomplishment in Education and Outreach Award , UCAR	2021
• Recognizing the leadership, talent and efforts of the Explorer Series team	
Scientific and Technological Activities Commission Distinguished Scientific/Technological Accomplishment Award , American Meteorological Society	2021
Best Student Paper , American Meteorological Society Annual Meeting	2000
Irene P. Goldring Award , State University of New York at Purchase, Purchase NY	1997
• In recognition of a graduating woman who has demonstrated promise for a career in science or mathematics	
Best Student Research Project , State University of New York at Purchase, Purchase, NY	1997

8. Publications (Citations: 6495, H-index: 43, i10-index 75)

8.1 Thesis

Beres, J. H., 2002. Gravity waves generated by tropical convection: generation mechanisms and implications for global circulation models. Ph.D. thesis Dept. of Atmospheric Science, University of Washington, 129 pp.

8.2 Book Chapters (1)

- [1] C. Heale, **Richter, J. H.**, M. J. Alexander, J. T. Bacmeister, C. Heale, C. Kruse, J. Wei, 2023: Gravity wave drags in the atmosphere; Ch 11 of: Fast Physics in Large Scale Atmospheric Models: Parameterization, Evaluation, and Observations, *Editors: Yangang Liu; Pavlos Kollias; Leo Donner (advisor), Geophysical Monograph Series*, 350 pp.

8.3 Refereed Journal Articles (99)

- [1] Alexander, M. J., **J. H. Beres** and L. Pfister, 2000: Tropical stratospheric gravity wave activity and relationship to clouds. *J. Geophys. Res.*, **105**, 22,299-22,309.
